## Initial build review

- Like the idea of kraby patty inspired hamburger menu
  - Might be hard to implement the actual ingredients. Can Instead use rectangles with rounded corners and each layer uses the color of the ingredients.
- If the hamburger menu can be developed, then remove the sticky bar. Just make the logo and menu icon sticky.
- Text wording and tone can be more outlandish - emulate how Spongebob would say it
- More texture (like bubbles, coral patterns, etc.): in backgrounds, buttons, etc.
- Emphasize color presence. More vibrant, stronger contrasts.
- Take out the social media icons
- Character pokemon cards
  - Carousel to navigate between characters
  - Back: character concept art/sketches
