Project Title: Spongebob Squarepants

I'd like to build this site as a linear experience, so the main form will be a long, single page website. (More detailed, clickable information like each character info can be on a separate page; the sources can also be a separate page). A collapsible side menu with navigation links that quickly jump to different sections of the page.

- Landing page: Intro - show premise
- Main characters
- How did the show come to be - Ideation & early concepts
- Franchise - Spinoffs, comics, movies, games
- Internet Presence - memes
- Sources
